TERRAZZO.

SURFACE.

POL

POLISHED

Polished surface is glossy and reflects light. It's ideal for indoor applications. Achieved through intense grinding and buffing process.

GLO

GLOSSY

Glossy tiles have a shiny finish achieved through glazing and firing.

STR

STRUCTURED

Structured tiles offer enhanced grip and visual appeal, while mimicking genuine materials for added depth and authenticity. This type of tile undergoes an embossing process.

LAP

LAPPATO

Achieved through a mechanical grinding process, lappato tiles retain some shine while maintaining a degree of slip resistance. They are suitable for both residential and commercial spaces.

SOF POL

SOFT POLISHED

Soft polishing involves a less intense buffing process, resulting in a smoother texture than a fully polished surface. It's suitable for areas where a refined yet understated look is desired.

MAT

MATTE

Matte tiles have a flat finish and don't reflect light, making them ideal for spaces where a more muted appearance is preferred, like living rooms or bedrooms.

LE GENDS.

FEATURES

TECHGRIP

Designed to offer increased slip resistance when in contact with water, TechGrip ensures a safer surface without compromising its sleek matte appearance. Perfect for spaces where safety and aesthetics are equally important.

20 MM

Exceptional strength and resistance. This thickness ensures better load-bearing capacity, making them suitable for areas that experience higher stress and traffic.

DIGITAL GLAZED

Digital Glazed tiles showcase a digitally printed glaze, delivering exceptional precision in replicating intricate patterns and textures. With vibrant and realistic visuals, these tiles elevate interior or exterior spaces, offering captivating depth and detail.

VELVET

Refers to a specialized surface texture that mimics the softness and appearance of velvet fabric. Achieved through grinding and surface treatment processes.

SUPER GLOSSY

Refinement of glossy tiles, boasting a superior luminous finish achieved through advanced and exquisite glaze materials. This elevated tile surface radiates unparalleled brilliance.

CARVING

This technique involves intricate sculpting or precise carving, resulting in rich and elaborate patterns, textures, or designs on the tiles. It adds an extra layer of sophistication, elevating the aesthetic appeal of spaces with its meticulously crafted and visually stunning surfaces.

BABYSKIN

Achieved through glazing materials, these tiles offer a smooth & soft finish which often compared to a baby's skin.

Indoor application.

OUTDOOR

Outdoor application.

WALL

Wall application.

FLOOR

Floor application.

TILES BODY

CERAMIC

Ceramic tiles are known for their versatility and come in a variety of designs. While they are suitable for many applications, they are generally not as durable as porcelain tiles.

UNGLAZED PORCELAIN

Unglazed porcelain tiles are dense and durable. They have a natural, unpolished surface, making them ideal for high-traffic areas as they provide excellent slip resistance.

GLAZED PORCELAIN

Glazed porcelain tiles are covered with a layer of liquid glass (glaze) and fired. They are more resistant to stains and wear and come in a wide range of colors and styles.

FULL BODY

Full body tiles are made with consistent color and material throughout the entire thickness of the tile. Even if the tile chips, the color remains the same, making them a popular choice for high-traffic areas.

COLORLED BODY

Colored body tiles have a colored layer beneath the surface glaze. If chipped, the color beneath is the same as the surface, providing a more consistent appearance, though they may not be as robust as full body tiles. These tiles offer a balance of style and durability.

DOUBLE LOADING

Double-loaded tiles are made by pressing two layers together, combining design flexibility on the surface with added strength from the base, suitable for moderate to heavy traffic areas.

SLIP RATING

The slip-resistance rating, often denoted by designations like R10 or R11 is a vital consideration when choosing tiles for different applications. These ratings help determine a tile's ability to provide traction and reduce the risk of slips and falls.

R10

Offer moderate slip resistance and are typically suitable for indoor spaces with low to moderate moisture levels, like residential kitchens.

R11

Tiles with an R11 rating provide higher slip resistance and are ideal for areas prone to moisture, such as bathrooms or commercial kitchens, where safety is paramount.

VARIATION

Tiles often feature color variation that can affect the overall look of a surface. This variation is classified into different categories. Understanding the different color variation categories allows you to select tiles that best match your design vision and the level of visual interest you want to achieve in your space.

V1

Minimal Variation - Tiles with V1 classification have a uniform appearance with very little or no change in color or pattern from tile to tile. These are ideal for spaces where a consistent and uniform look is desired.

V2

Slight Variation - Tiles classified as V2 may have a slight difference in color or pattern between tiles, creating a subtle and natural look. This variation adds a touch of authenticity without being too dramatic.

V3

Moderate Variation - Tiles in the V3 category exhibit a noticeable variation in color and pattern from tile to tile. This creates a more dynamic and organic appearance, adding character to the surface.

V4

Substantial Variation - V4 tiles feature a significant variation in color and pattern, resulting in a striking and bold aesthetic. These tiles are often chosen for spaces where a dramatic and unique design is desired.
